Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jung, Korean Patent document 2000-0004766.

Jung has the frame 8, support rail 18, and decoration cover 42.

See body frame 40/48, fixation parts 46, 26, and lateral surface of rail 18 at 22, claim 2.

See rib 40, claim 3.

As to claim 4, see fixation parts 46 extending from an upper portion of body frame 40/48 and being adjacent each other, claim 8.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-7, 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jung in view of Kohlpaintner et al..

Art Unit: 3612

Jung uses bolts and screws for fastening. It would have been obvious to one of ordinary skill to provide in Jung snap fastening via a fixation part 5' as taught by Kohlpaintner et al.. The upper and lower members of the member 5' snap onto the rail 18 as an obvious expedient to increase securement force. Further see immediately below.

As to claim 6, Kohlpaintner et al. teaches snap fastening via a barb at 10' and such is also common knowledge in the art in order to remove the necessity to use adhesive.

As to claim 7, use of the snap connector 5' in conjunction with dual clips is deemed to be of common knowledge in the art, obvious to use here to improve securement.

Allowable Subject Matter

5. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All show fixed side shields for sunroofs.
